### **Expenditure Adjustments**

Expenditure Adjustments include \$26,000 that was transferred to Executive Protection Program for overtime from Investigations and Patrol. Two positions were eliminated and \$102,000 was cut from the Director's Office and the FTPs and funding were transferred to Patrol and Law Enforcement Programs. In addition, \$130,900 was authorized by the Division of Financial Management through the noncognizable spending process to use private funds to pay overtime and operating expenses related to the National Governor's Association annual meeting held in Boise during the summer of 2002. Any excess funding shall be returned to the General Fund to offset appropriations given to the agency for this event. The agency also transferred \$200,000 of federal spending authority from the POST Division to the Director's Office Program.

outlay \$6,000.

**Support Services** 

The Records Unit in the Bureau of Criminal Identification is responsible for processing and maintaining all criminal history records for the state. The Records Unit three person staff of Office Specialist II positions was cut to two in the FY2002 Negative Supplemental. The unit's ability to provide complete processing of all arrest and dispositions has been greatly impacted. It is only through the assistance of temporary personnel that the unit has averted a significant backlog. The unit processes approximately 62,000 arrest fingerprint cards per year. However, a backlog of dispositions that need manual processing has grown significantly to an estimated 7,000 records. This request is to use revenue from fingerprint background checks to hire one Office Specialist II. Personnel costs total \$34,800 and operating expenditures are \$2,000.

### 6. Electronic Transfer of Fingerprint Cards

**Support Services** 

Livescan Technology - This DU represents the cost to transmit electronically fingerprint cards from local agencies to the ISP central repository. This will increase the completeness, accuracy, and timeliness of processing criminal arrest fingerprint cards. Nine of the largest arrest booking agencies use livescan devices to produce arrest fingerprint cards, the source documents for criminal history records. This is 75% of the cards received by the central repository. This is an ongoing expense at a cost per site of \$1,500 per year, for a total of \$13,500 for nine sites.

#### 7. Interface to ITDs Digital Photo Database

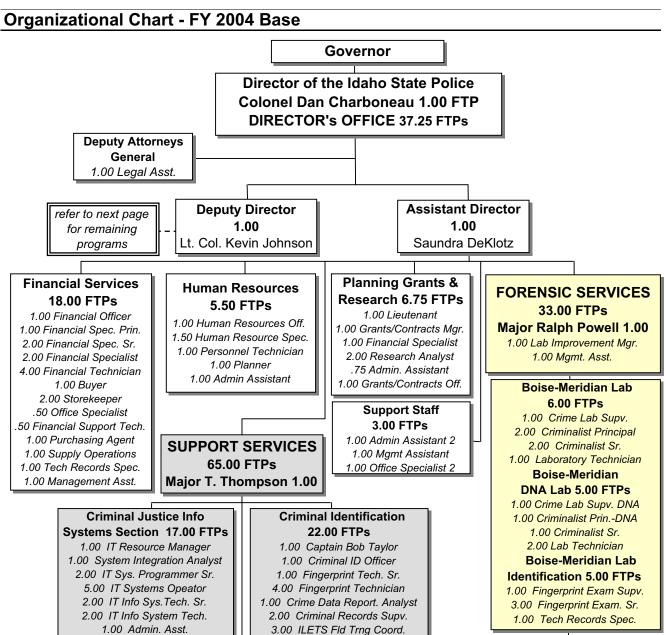

**Support Services** 

To assist local and state law enforcement with identification activities, the ISP Bureau of Criminal Identification has maintained a file of duplicate driver's license photographs. In 2001, BCI disseminated 4,025 photographs to criminal justice agencies from the manual file. The bureau also has the ability to retrieve photographs from the new Idaho Transportation Dept digital photograph database. The current system of disseminating photographs to law enforcement is primarily manual/paper-based and thereby inefficient. This DU proposes an expansion of law enforcement's on-line availability to the ITD digital photo database. This enhancement represents the one-time costs to develop an interface to the ITD database.
